

Affordable Sophistication

When you approach business with one guiding philosophy, good things happen. Our creed:

Make Each Client Proud to be a Referral Site .

Here's what our STRATUS clients are saying:

" We couldn't live without this system now. It gives me an instantaneous view of how were are doing without having to leave my desk"

"Our Customer Service Reps proactively help the clients now. Before it was like trying to find a needle in a haystack. STRATUS removes the daily task of reporting numbers directly to our clients. Now it's in their hands. Bravo!"

"Could we have done this ourselves? Sure, but at what price to our Team? It would have taken years, costs mega-bucks and would never have been this easy to use., easy to maintain, and even easier to grow with. The speed at which the coordinated effort of your team, guiding us towards the goal line is worth the investment alone"

Make Every Solution..... Productive!

The screenshot displays the STRATUS software interface. On the left, a dashboard shows job status bars: 'Job is due beyond tomorrow' (grey), 'Job is due tomorrow' (blue), 'Job is due today' (yellow), 'Job is late' (red), and 'Job is complete' (green). Below these are status indicators for 'Scan is late!' and 'Scan anticipated'. A list of tasks is shown, including 'Signed Contract Received', 'Data Proof Sent', 'Art Proof Sent', 'Inserting PB1', 'Jeff', 'Lamination2', 'Internal Art/Data', 'Data File from IT submitted to Production', 'Laser Printing', 'Indigo Printing', 'Buskro "B2" Printing', and 'Carriers Printed'.

In the center, a 'Settings' window is open, showing tabs for 'My Profile', 'All Users', and 'Scan Stations'. The 'Scan Stations' tab is active, displaying a form for adding a new station with fields for 'Station Name', 'IP Address', and 'Stratus Columns'. A 'Save Station' button is at the bottom.

On the right, a dropdown menu is open, showing options: 'Not Done', 'Done', 'Not Started', 'Started', 'Ship Today', 'Ship Tomorrow', 'Ship Late', 'Start Ship Date', 'End Ship Date', and 'Start Receive Date'.

Below the settings, a table displays job data:

Client	Requested By:	Ship Date / Mail C	Client Phone	Progress	Order Number	Quantity
-		TBD		5% Complete	JO1204-00002	0
- Fifth Client	Jane Do2	6/8/2012	555-555-1232	36% Complete	59644352202015	8620
- Fifth Client	Jane Doe	6/5/2012	555-555-1234	73% Complete	84458372202011	668
- Second Client	Jane Doe	4/10/2012	555-555-1234	47% Complete	3159372202011	811
- Fourth Client	Jane Doe	4/20/2012	555-555-1234	19% Complete	21859372202011	3207
- First Client	Jane Doe	4/10/2012	555-555-1234	62% Complete	40659372202011	6947
- Fourth Client	Jane Doe	5/17/2012	555-555-1234	95% Complete	59359372202011	3697
- First Client	Jane Doe	5/16/2012	555-555-1234	80% Complete	78059372202011	3156
- Third Client	Jane Doe	5/26/2012	555-555-1234	98% Complete	96759372202011	6975
- Fifth Client	Jane Doe	5/26/2012	555-555-1234	13% Complete	1540382202011	8969
- Fourth Client	Jane Doe	5/27/2012	555-555-1234	31% Complete	3430382202011	1886
- First Client	Jane Doe	4/11/2012	555-555-1234	85% Complete	5300382202011	6191
- Second Client	Jane Doe	6/8/2012	555-555-1234	20% Complete	7160382202011	7122

At the bottom, an 'Edit Grid Columns' window is open, showing a grid of columns with their names and types, such as 'Client Name', 'Requested By:', 'Last Station', 'Next Station', 'Ship Date / Mail Date', 'Client Phone', 'Job Progress', 'Job Order #', and 'Quantity'.

Make Every Solution... Productive !

How does STRATUS Work?

Order Entry

Create your jobs, enter all the details including password protected cost levels. Release the job to sign-off & production. Save the job for immediate recall when it's reordered.

Work Flow

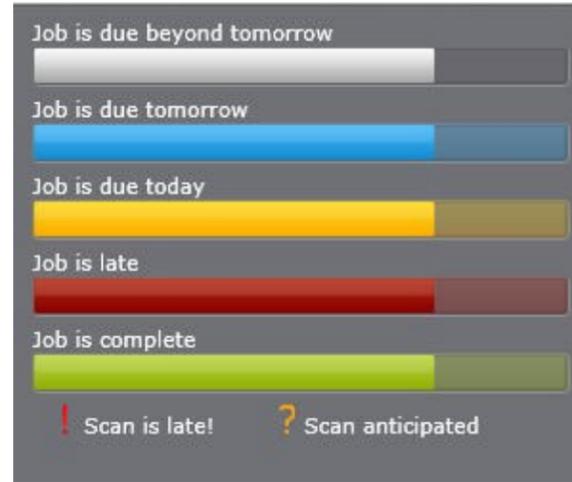

Tell STRATUS the process each order must follow. This includes the path re-work must take as well.

Job Level	Projected	Time	Quantity	Backfill
Indigo Printing	1/25/2013	3:00 PM	5000	✓
Lamination / Diecut	1/25/2013	3:00 PM	5000	✓
Break and Box	1/26/2013	3:00 PM	5000	✓
Matched	1/27/2013	3:00 PM	5000	✓
GV Affixing	1/27/2013	3:00 PM	5000	✓
Inserting	1/28/2013	3:00 PM	5000	✓
Mail or Final Audit	1/28/2013	3:00 PM	5000	✓
Invoice Sent	1/29/2013	3:00 PM	5000	✓

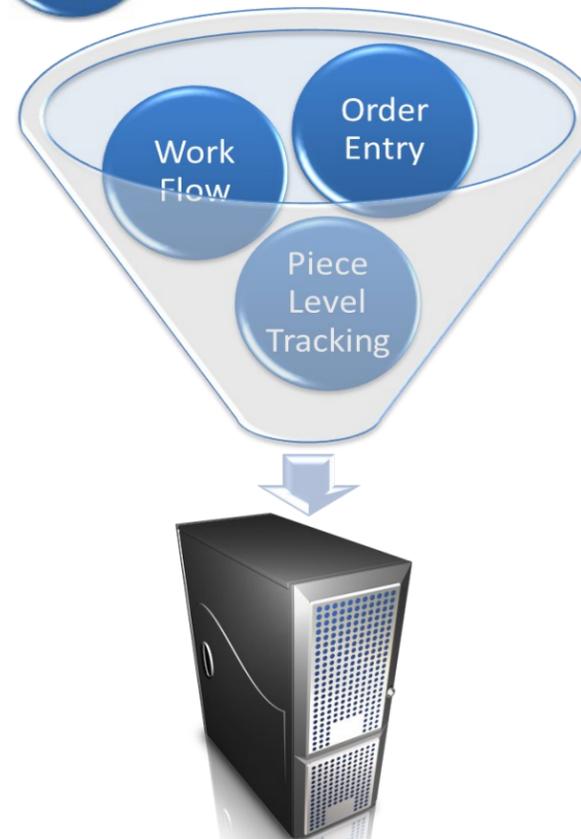

Pull Requests

Confirm removal of specific pieces. Satisfy client requests to pull pieces from a current production job. Accomplish it easily with the help of STRATUS. Manually pull items by hand or automatically divert with Data-Trac & Kit-Trac Integrity Controls

STRATUS knows the individual path of each job. It makes sure no steps are skipped in the process, and it knows where the last step in a job occurred helping you find lost work easily.

Process Monitor

Stratus

Automated Rework

By knowing your job specific work flow, scrap created in the process can automatically be rescheduled and tracked for meeting up with the job before final QC & Shipment

The highest level tracking procedure. Operators manually read a barcode on the Job Ticket to Start & Complete a task at these stations. All actions are time stamped.

In parts of your business, it helps to know exactly where you are in a job. STRATUS is compatible with our family of Production Integrity Systems that can track & control a host of manufacturing processes.

Piece Level Tracking

Maintenance Monitoring

Operators can automatically send Text & E-mail messages to Maintenance Staff, Managers, Purchasing, Shipping and CSR's whenever a process has a problem. Monitor the issue status, and expected uptimes remotely.

Use the power of STRATUS and our Piece Level Tracking Components to insure complete job integrity from start to finish.

Job Integrity

How do you use STRATUS ?

Enterprise Resource Planning (ERP) systems seamlessly integrate information about your production, costs and customers into one big database. While they might be perfect for the big guys, **they are ridiculously costly** for the small business owner. **You want one**, but you can't afford the upfront costs, let alone **the customization costs that come with implementation.** We're talking potentially 7 figures, for these solutions!

You need one, but the complexity of converting most of your existing tracking methods into "their way of thinking" will crush your business while you retool your methods.

Enter **STRATUS, the production floor tracking & reporting solution for the smart business owner.** This is the system for the small to medium business owner. The one that wants to have access to the data without refinancing their business to achieve it.

Why STRATUS ?:

If you're making products and shipping it on time or ahead of schedule you have a leg up on the competition. We help you stay ahead of the curve by focusing solely on the production floor. What you're doing right, and what needs improvement. Clear, concise, simple.

STRATUS allows your team the ability to monitor what's going on in near real time, from anywhere in the world with internet access. Laptops, Cell Phones, Tablets. Now you can check on work even when you're on "vacation" (Just don't tell your spouse!)

Imagine the time savings alone, and see why your time for STRATUS has come.

Executives

See your production floor status from any where you have internet access. Your Office, On the plane, On the next Continent. No need to call, it's all there right at your fingertips.

- What's shipping on time
- What's Late
- Notes on why it's late, with the ability to respond within STRATUS
- Access to production times and costing's for better planning and job bidding

Customers

At your discretion, each customers can have access to their STRATUS Job status .

- Simply create a "user" account for your client
- Grant them limited access to what they can view (their production data only)
- Give them the Login Link, User Name & Password so they can view their jobs remotely.

This frees your Customer Service Representatives to support new clients, or more clients efficiently.

Production Management

Check the status of your day, throughout your shift, and across multiple building / facilities.

- What's on time
- What's behind
- Where the rework is and who's in charge of the account.
- What are the maintenance issues at the moment, and the ability to adjust which ones get fixed first
- Be PROACTIVE not REACTIVE
- Keep the team informed of the shifting priorities

Sales Support

Don't forget the powerful Sales Tool possibilities of STRATUS:

- Know in an instant the status of your clients jobs
- Be able to notify your clients that a production run is awaiting shipment when it happens
- Giving a plant tour? Be notified of production maintenance issues before going out on the floor
- Get the latest status on your phone before the face to face sales call
- Better yet, show them the status on your Wi-Fi connected laptop by creating a login right in their board room

Accounting

STRATUS is not an accounting system. However you can be informed of what is pending in shipments. Timely invoices help accounts receivable and ultimately cash flow.

Purchasing

Be informed via e-mails or when there's a part that needs to be ordered immediately. The Maintenance Mode links directly with Purchasing to create an efficient crisis response effort.

- Leave notes indicating parts availability and delivery tracking information for maintenance personnel.
- Inform Shipping to be on the look out for the parts so that the machine can be back up and running in as timely a fashion as possible.

Operators

- Know what you have to run by shift end
- Know what pieces need to be pulled
- Know where the rework is
- Know where the job goes next.

MIS Department

Simple to use and even easier to maintain. We work with your team creating the base screens. Compatible with most small to medium size businesses.

- With built in editing tools you can modify the screens and collection points as your application grows.
- All data is stored in Microsoft SQL
- Format is fully customizable for any type of production reporting you want to create
- Serviced via CITRIX Secure GOTOASSIST, or on site service is available.

Shipping

Know what is expected to ship today.

- Where's the rework, who's the CSR, whether or not it's a priority
- Know when emergency parts are coming in, and where they go.

Maintenance Staff

Linked to your cell phone and receive messages about maintenance issues throughout the facility.

- Know the potential issue before you get there, so you can bring the proper equipment and tools
- Instantly evaluate the issue and update the facility via internal notes and messaging
- ONLY receive messages for the shift you are on, OR receive all the issues if you are a maintenance supervisor.
- Once debugged, add the issue to a growing list of maintenance items for that process, to streamline service calls for the operator in the future.
- Order parts and inform purchasing of your needs immediately
- Know when purchasing has ordered the parts and tracking details for the shipment
- See detailed historical notes on all machine maintenance records.
